1. Account & Authentication

What it does

Secure email/password authentication with email verification, password recovery, and protected routes throughout the entire application. Unauthenticated users are redirected to `/login` automatically.

Pages

Page	URL	Purpose
Register	<code>/register</code>	Create new account
Login	<code>/login</code>	Sign in to existing account
Verify Email	<code>/verify-email</code>	Confirm email after registration
Verify Required	<code>/verify-email-required</code>	Prompt if email not yet verified
Forgot Password	<code>/forgot-password</code>	Request reset link
Reset Password	<code>/reset-password?token=...</code>	Set new password via email link

How to Register

1. Go to </register>
2. Enter your name, email, and a password (8+ characters)
3. Check the **"I accept the Terms of Service"** checkbox — registration will fail without it
4. Click **Create Account**
5. Check your inbox for a verification email and click the link inside
6. After verifying, you are redirected to onboarding

How to Log In

1. Go to </login>
2. Enter email and password, click **Sign In**
3. On success you land on </dashboard>
4. If email is not verified, you are redirected to </verify-email-required>

How to Reset Password

1. Go to </forgot-password>, enter your email, click **Send Reset Link**
2. Open the email, click the link (valid 1 hour)
3. On </reset-password>, enter and confirm your new password, click **Reset Password**
4. Log in with the new password

Testing Checklist

- ☐ Register with valid data → receives verification email
 - ☐ Register without checking Terms → **400** error shown, account not created
 - ☐ Register with duplicate email → "Email already in use" error
 - ☐ Login with wrong password → error shown, no access
 - ☐ Login with unverified email → redirected to [verify-email-required](/verify-email-required)
 - ☐ Forgot password → email arrives, link works once, expires after use
 - ☐ Accessing </dashboard> while logged out → redirects to </login>
-

2. Onboarding — Store Profile Setup

What it does

A multi-step AI-guided interview that builds your store's marketing profile. Stormo uses every answer to personalise all AI-generated actions, content, campaigns, and chatbot responses. **This runs once** after first registration and cannot be skipped.

How it works

- You are asked a series of questions (product type, store URL, target customer, weekly time available, current channels, niche description, challenges, goals)
- Each answer is optionally parsed by AI to skip redundant follow-up questions
- All answers are saved as your **store profile** in the database
- On completion, you are redirected to </dashboard>

How to use

1. After verifying your email, you land on `/onboarding`
2. Read each question and type your answer in the text area
3. Press **Enter** or click **Next** to advance
4. Some questions offer quick-select chips — tap a chip to pre-fill the answer
5. After the final question, click **Complete Setup**
6. The AI spends ~5–10 seconds building your first action plan, then redirects to the dashboard

Testing Checklist

- ☐ Complete onboarding → redirected to dashboard with action plan ready
- ☐ Skip a question (empty input) → should either block or accept with a default
- ☐ Re-visit `/onboarding` after completing → should redirect to `/dashboard`
- ☐ Verify store profile saved: open **Ask Stormo**, ask "What is my store about?" — it should reference your answers

3. Dashboard — Home

URL: `/dashboard`

What it does

The central control panel. Shows your personalised greeting, live stats, today's action plan, sales tracker, focus panel, and complete action history in a single scrollable view.

Widgets visible on this page

Widget	Location	Purpose
Welcome header	Top	Name, date, plan badge, streak, sales count
Notification banner	Below header	One-time push notification opt-in
Weekly Summary Card	Conditional (Mon–Wed)	Last week's recap (dismissible)
AI Insight Card	Below summary	Latest AI-generated marketing insight
Dashboard Banner	Context-aware	Onboarding prompt / day-streak encouragement
Progress Tracker	Cards row	Actions this week, streak, completion rate
Daily Action Card	Main (70% width)	Today's personalised marketing task
Sales Counter	Sidebar	Log and track sales toward Growth tier
Today's Focus Panel	Below Sales	Quick context: channel, effort, priority
Action History	Bottom	Full paginated record of all past actions

Stats on the welcome header

- **Plan badge** — Starter / Growth (reflects subscription tier)

- **Days active** — days since account creation
- **Sales** — total logged sales
- **Streak badge** — visible only when streak ≥ 1 day

Testing Checklist

- ☐ Log in → dashboard loads within 3 seconds
- ☐ Header shows correct first name and today's date
- ☐ Plan badge matches subscription tier in Settings
- ☐ Streak badge appears after completing an action
- ☐ All widgets visible without horizontal scroll on mobile

4. Daily Action Plan

Component: `DailyActionCard` · **API:** `GET /api/actions/today`, `POST /api/actions/generate`

What it does

The most important feature. Every day, Stormo's AI generates one specific, personalised marketing task for your store — tailored to your channel history, niche, target customer, and what you have already tried. The card shows the task title, a description, the estimated time, and a ready-to-use copy template.

Action lifecycle

```
[generated] → pending → [user acts] → completed / postponed / skipped
```

How to use

1. Open the dashboard — the card loads your action for today automatically
2. Read the **title** and **description** to understand what to do
3. Use the **Copy Template** box to copy the exact text to post/send
4. When done, click **Mark Complete** — the card switches to "All caught up!"
5. If you cannot do it today, click **Do Tomorrow** — moves the action to tomorrow with status `postponed`

Status meanings

Status	Meaning
<code>pending</code> / <code>scheduled</code>	Today's active action — do this now
<code>completed</code>	Done — results can be logged in History
<code>postponed</code>	Moved to tomorrow via "Do Tomorrow"
<code>skipped</code>	Manually skipped from History

"All caught up" state

After marking complete (or if you already completed today's action and re-open the dashboard), the card shows a green checkmark and "All caught up!" — no new action is generated until tomorrow.

Generation skeleton

While the action loads or generates, you see an animated skeleton with rotating status messages ("Evaluating your marketing channel history...", etc.). This is normal and takes 5–15 seconds on first generation.

Testing Checklist

- ☐ Fresh day → skeleton appears, then action card appears with title + description + template
 - ☐ Copy template button → text copies to clipboard, button shows "Copied!"
 - ☐ Mark Complete → card instantly shows "All caught up!" green state
 - ☐ Mark Complete → Action History immediately shows the completed action at top
 - ☐ Mark Complete → Today's Focus panel also switches to "All done today!"
 - ☐ Mark Complete, reload page → still shows "All caught up!" (no duplicate generation)
 - ☐ Do Tomorrow → action moves to tomorrow, card shows next available action or "All caught up!"
 - ☐ Error state → "Generation paused" card with **Try Again** button appears
-

5. Sales Tracker

Component: `SalesCounter` · **API:** `GET /api/sales`, `POST /api/sales`

What it does

Tracks every sale you make and displays your progress toward the **10-sale Growth milestone**. Once 10 sales are logged, you become eligible to upgrade to the Growth plan.

How to use

1. On the dashboard sidebar, find the **Sales Tracker** card
2. Click **Log a Sale**
3. Select the **channel** where the sale came from (Instagram, TikTok, Email, Pinterest, Reddit, Other)
4. Optionally add a **note** (e.g., "First customer from my reel")
5. Click **Save Sale** — the counter updates immediately

Progress bar

- Shows `X / 10 sales — N more to unlock Growth`
- Once 10 reached: bar fills, **Growth plan is now available!** upgrade prompt appears
- Confetti fires when the 10th sale is logged

Testing Checklist

- ☐ Click Log a Sale → inline form appears without page reload
- ☐ Submit with channel only (no notes) → sale saved, counter increments
- ☐ Submit with notes → note appears in "Recent" list below the counter
- ☐ Log 10th sale → confetti fires, Growth upgrade prompt appears
- ☐ Cancel form → form closes with no changes

6. Today's Focus Panel

Component: `ActionContextPanel` · **API:** `GET /api/actions/today`

What it does

A compact sidebar card that shows key metadata about today's active action: channel, category, estimated effort, priority, and a scheduled date. Also shows a **Suggested Next Step** tip based on the action type. When today's action is done, it shows "All done today!" automatically.

Rows displayed

Row	Example value
Channel	Instagram
Category	Content
Est. Effort	~35 min
Priority	High
Scheduled	Mon, Jun 29

Suggested Next Step examples

- **Community** → "Engage with 5 posts in your niche community before end of day."
- **Content** → "Schedule your next post before the day ends to stay consistent."
- **Outreach** → "Follow up with anyone who didn't respond within 48 hours."
- **SEO** → "Check ranking changes in Google Search Console tomorrow."
- **Paid Ads** → "Review spend vs. conversions before your next budget reload."

Testing Checklist

- ☐ Panel shows correct channel and category matching the Daily Action Card
- ☐ After marking action complete → panel switches to "All done today!" green card
- ☐ Panel updates without page reload when action is completed

7. Action History

Component: `ActionHistoryList` · **API:** `GET /api/actions/history`

What it does

A paginated table of every action ever generated for you, with status badges, channel tags, and an expandable results panel for each row. Supports filtering by status and channel.

How to use

1. Scroll to the bottom of the dashboard

2. See all actions in reverse chronological order
3. Use the **Status** and **Channel** dropdowns to filter
4. Click the ↺ **refresh** icon to manually reload
5. Click any row to expand its results panel
6. For **completed** actions — log your results (reach, engagement, sales, notes)
7. For **pending / postponed** actions — change status to Complete or Skip

Filters

Filter	Options
Status	All · Completed · Pending · Postponed · Skipped
Channel	All · Reddit · Instagram · Email · Pinterest · SEO · Paid Ads

Results panel (completed actions)

When you expand a completed action row:

- **Log Results** form with: Reach, Engagement, Followers Gained, Sales Attributed, Clicks to Store, Email Signups, Notes
- Click **Save Results** — data is stored and shown next time you expand
- Results feed the Performance Dashboard analytics (unlocks at 20 logged results)

Status change controls (pending/postponed actions)

When you expand a pending or postponed row:

- **Mark Complete** button — immediately sets status to completed
- **Skip** button — sets status to skipped
- Changes update the row badge instantly without a full page reload

Load more

Click **Load More** at the bottom to fetch the next page (10 rows per page). Filters reset to page 1 automatically.

Testing Checklist

- ☐ Table loads with all past actions on dashboard open
- ☐ Filter by Status: Completed → only completed rows shown
- ☐ Filter by Channel: Reddit → only Reddit actions shown
- ☐ Expand completed row → results form appears
- ☐ Fill results form and Save → "Results saved!" confirmation, data persists on re-expand
- ☐ Expand pending row → Mark Complete button appears
- ☐ Mark Complete from history → row status badge updates to "Completed" instantly
- ☐ Skip from history → row status badge updates to "Skipped" instantly
- ☐ Load More → 10 more rows appended (table does not flash/reload)
- ☐ After completing action via Daily Action Card → history refreshes silently (no skeleton flash)
- ☐ Manual refresh button → table updates, existing rows stay visible during refresh

8. My Content — Weekly Content Hub

URL: `/dashboard/content` · **API:** `GET /api/content`, `POST /api/content/generate`

What it does

Every week, Stormo generates **6 pieces of ready-to-use marketing content** tailored to your store: Instagram post, Reddit post, outreach email, product description, Pinterest pin, and blog outline. All content is AI-written using your store profile.

Content types generated

Type	What you get
Instagram Post	Caption with hashtags and CTA
Reddit Post	Community-friendly thread with natural tone
Outreach Email	Cold/warm email template for partnerships
Product Description	SEO-optimised product copy
Pinterest Pin	Pin title + description
Blog Outline	Structured H1–H3 outline with content points

How content is generated

- Content is generated in **parallel** (6 independent AI calls) in the background
- A **"Generating your weekly content..."** progress banner shows with live checkmarks
- Content appears piece by piece as each completes (every ~30–60 seconds)
- The page **polls automatically** — no manual refresh needed
- Polling stops automatically after all 6 pieces are ready (max 4 minutes)

How to use

1. Go to **My Content** in the sidebar
2. If content is generating, watch the progress banner — each piece appears as a card
3. When ready, click **View & Copy** on any card
4. In the modal: read the full content, click **Copy All** to copy to clipboard
5. Paste directly into your platform of choice
6. Previous weeks appear in a collapsible accordion below this week's content

Testing Checklist

- ☐ First visit this week → generating banner appears with 6 spinner badges
- ☐ Watch for 1–2 minutes → badges turn green one by one as pieces complete
- ☐ Click View & Copy → modal opens with full content
- ☐ Copy All in modal → clipboard contains full text, button turns green "Copied!"
- ☐ Close modal → returns to content grid, no state lost
- ☐ Previous week accordion → click to expand, shows prior content cards

- ☐ Onboarding not complete → "Setup Profile Required" prompt shown instead of content

9. Campaigns — Seasonal Planner

URL: /dashboard/campaigns · **API:** POST /api/campaigns/generate

What it does

A visual event calendar showing upcoming retail and seasonal events (July–October). For any event, you can generate a **complete 3-day AI campaign plan** personalised to your store, including a campaign overview, suggested daily actions, and content ideas.

Upcoming events in the calendar

July 4 · Amazon Prime Day (Jul 14) · Back to School (Jul 25, Aug 15) · National Dog Day (Aug 26) · Labor Day (Sep 7) · Fall Season Start (Sep 22) · Breast Cancer Awareness Month (Oct) · Halloween (Oct 31)

How to use

1. Go to **Campaigns** in the sidebar
2. Browse the 4-month calendar grid — coloured event badges mark each event date
3. Click any event badge or the **Plan Campaign** button in the event list below the calendar
4. Wait ~10–20 seconds while the AI generates (rotating status messages show progress)
5. Review your campaign plan: overview paragraph, 3 suggested daily actions, and content ideas
6. Use the plan to schedule your work around that date

Testing Checklist

- ☐ Calendar renders with correct event dates (Jul 4 on a Saturday, etc.)
- ☐ Click an event → generating animation starts
- ☐ Campaign plan appears with event name, overview, suggested actions list, content ideas
- ☐ Generate for a second event → new plan replaces the previous one
- ☐ Campaign text references your actual store niche (not generic)

10. Outreach — Influencer CRM

URL: /dashboard/outreach

What it does

A lightweight CRM for managing influencer contacts. Add individual contacts, generate personalised AI cold-pitch emails for each, or paste a list of handles for bulk AI scoring and analysis.

Features

Feature	What it does
Add Contact	Save name, platform, profile URL, follower count, niche, notes

Feature	What it does
AI Pitch Generator	Write a personalised cold-pitch email for any contact
Bulk Analyse	Paste multiple handles → AI scores each for store fit
Contact List	View all saved contacts with platform icons

How to add a contact

1. Click **+ Add Contact**
2. Fill in: Name, Platform (Instagram/TikTok/YouTube/Blog/Podcast), Profile URL, Follower count, Niche, Notes
3. Click **Save** — contact appears in the list

How to generate an AI pitch

1. Find the contact in the list
2. Click **Draft Pitch** (email icon)
3. Wait ~10 seconds — AI writes a personalised pitch referencing the contact's niche and your store
4. Click **Copy** to copy the full email text

How to use Bulk Analyse

1. Click **Bulk Analyse**
2. Paste a list of Instagram/TikTok handles (one per line)
3. Click **Analyse** — AI scores each handle for relevance to your store, estimates audience size and engagement
4. Results show a scored table — use this to prioritise who to contact

Testing Checklist

- ☐ Add contact → appears in list with platform icon
- ☐ Add contact with profile URL → URL is clickable
- ☐ Draft Pitch → email references the contact's name, platform, and niche
- ☐ Draft Pitch → email references your store product type (from profile)
- ☐ Copy pitch → clipboard contains full email
- ☐ Bulk analyse → paste 3 handles, results appear scored
- ☐ Delete contact → removed from list without page reload

11. Performance Dashboard

URL: </dashboard/performance>

What it does

Aggregate analytics built from the results you log in Action History. Shows a full marketing funnel, 30-day vs prior period trends, platform and action-type breakdowns, and your top 5 highest-performing actions.

Unlock requirement

You must log results for **at least 20 completed actions** before the dashboard unlocks. Until then, a progress bar shows how many you have logged (x / 20).

Sections

Section	What it shows
Conversion Funnel	Total Reach → Engagement → Clicks to Store → Sales Attributed
30-Day Trend	Reach, Engagement, Sales vs prior 30 days with +/- badges
Platform Breakdown	Bar chart — which channel drives the most sales
Action Type Comparison	Bar chart — which action type (community/content/outreach/seo) converts best
Top 5 Actions	Ranked list of your best actions by sales attributed

How to use

1. Go to **Performance** in the sidebar

2. If not yet unlocked, continue logging results in Action History

3. Once unlocked, all sections load automatically

4. Use Platform Breakdown to identify your best channel

5. Use Action Type Comparison to see whether community, content, outreach, or SEO drives most sales

6. Use 30-Day Trend to see if your marketing is improving month over month

Testing Checklist

- ☐

With fewer than 20 results → lock screen with progress bar shown

☐

With 20+ results → full dashboard loads with all 4 sections

☐

Conversion funnel shows correct totals (cross-check with history logs)

☐

30-day trend: complete an action and log results → numbers update next visit

☐

Platform breakdown bar widths are proportional to sales values

☐

Top 5 actions are ranked highest → lowest by sales attributed

☐

Trend badges: green for positive change, red for negative

12. Milestones & Achievements

URL: </dashboard/milestones>

What it does

Gamified achievement system that rewards consistency and growth. 9 milestones unlock automatically as you use the platform. Each unlocked milestone triggers a confetti animation on the dashboard.

All 9 milestones

Milestone	Key	How to unlock
First Step Forward	first_action	Complete your first daily action

Milestone	Key	How to unlock
Consistency Builder	first_week	Maintain a 7-day streak
Content Creator	first_content	View your first AI-generated content
Outreach Explorer	first_outreach	Add your first contact to Outreach CRM
First Dollar	first_sale	Log your first sale
Growth Engine	ten_sales	Log 10 total sales
One Month Strong	thirty_days	Be active for 30 days
Marketing Pro	ninety_days	Be active for 90 days
Influencer Partner	first_influencer_deal	Close first influencer deal

How to use

- 1. Go to **Milestones** in the sidebar
- 2. Unlocked milestones appear as **orange-bordered cards** with a Trophy icon and the date achieved
- 3. Locked milestones appear as **grey cards** with a Lock icon and the unlock requirement
- 4. The **total sales counter** at top shows your progress toward Growth Engine
- 5. Click **Report a Sale** to log a sale directly from this page (same as Sales Tracker)
- 6. If you have 10+ sales and have not yet upgraded, a pulsing **upgrade banner** appears

Testing Checklist

- ☐ Complete first action → "First Step Forward" card turns orange on next Milestones visit
- ☐ View content page → "Content Creator" milestone unlocks
- ☐ Add outreach contact → "Outreach Explorer" milestone unlocks
- ☐ Log first sale from Milestones page → "First Dollar" milestone unlocks
- ☐ Log 10th sale → "Growth Engine" unlocks + upgrade banner appears + confetti fires
- ☐ Locked milestones show description of how to unlock
- ☐ Achieved milestones show exact unlock date

13. Settings & Subscription

URL: /dashboard/settings

What it does

Manages your Stormo subscription plan (Starter / Growth), shows billing dates, and provides push notification controls.

Plan information shown

Field	Description
Current Plan	Starter or Growth

Field	Description
Next Billing Date	Date of next charge
Trial Ends At	If on trial, expiry date
Growth Unlocked	Whether 10-sale milestone reached
Total Sales	Your cumulative sales count

Plan actions

Action	When available	What happens
Upgrade to Growth	On Starter plan + Growth unlocked	Redirects to Stripe checkout
Downgrade to Starter	On Growth plan	Cancels Growth at period end
Cancel Subscription	On any paid plan	Subscription ends at billing period end

How to upgrade

1. Ensure you have 10+ logged sales (unlocks Growth eligibility)
2. Go to Settings, click **Upgrade to Growth — \$39/month**
3. Stripe checkout opens — complete payment
4. After success, redirected back to Settings with "You are now on the Growth plan!" banner

How to cancel

1. Go to Settings, click **Cancel Subscription**
2. A confirmation dialog appears — read the warning
3. Confirm → subscription is cancelled at period end (you keep access until then)

Push Notification Settings

A sub-section within Settings to manage browser push notifications (see Section 15 for full details).

Testing Checklist

- ☐ Settings page loads with correct plan tier badge
- ☐ Upgrade button visible only when Growth is unlocked (10+ sales)
- ☐ Upgrade → redirects to Stripe, after payment shows success message
- ☐ Cancel → confirmation dialog appears, requires explicit confirm
- ☐ Downgrade → confirmation dialog appears, tier changes at period end
- ☐ Settings loads with `?upgraded=true` param → success banner shown

14. Ask Stormo — AI Chatbot

Component: `AskStormo` · **API:** `POST /api/ask-stormo/message`, `GET /api/ask-stormo/history`

What it does

A floating AI assistant (bottom-right of every dashboard page) powered by Claude. It knows your store profile — product type, niche, target customer, and available time — so every answer is specific to your situation. Conversation history is saved and restored when you reopen the chat.

How to open

Click the **orange circular chat button** at the bottom-right of any dashboard page. Click it again (or the X) to close.

Suggestion prompts (shown when chat is empty)

- "What should I focus on this week?"
- "How do I find micro-influencers for my store?"
- "What's working in my niche right now?"

How to use

1. Click the chat button
2. Click a suggestion or type your question in the text area
3. Press **Enter** (without Shift) or click the orange **Send** button
4. Watch Stormo respond in real time — text streams in word by word
5. Ask follow-up questions — full conversation context is maintained (last 20 messages)
6. Click the **trash icon** in the chat header to start a fresh conversation
7. Click the **X** to close the panel (history is preserved for next time)

Message limits

- Maximum **2,000 characters** per message
- A character counter appears when you are within 400 characters of the limit
- Messages over 2,000 characters are blocked with an error

Testing Checklist

- ☐ Chat button visible on all dashboard pages
- ☐ Click button → panel slides up with suggestion prompts
- ☐ Click a suggestion → sends immediately, AI response streams in
- ☐ Type a custom question → response references your store niche/product type
- ☐ Close and reopen chat → previous conversation history restored
- ☐ Ask follow-up question → AI has context of previous messages
- ☐ Type 2,001+ characters → send button disabled, red counter shown, error message
- ☐ Trash icon → chat clears, suggestions screen shows again
- ☐ X button → panel closes, chat button returns
- ☐ Network error mid-stream → error message shown, empty placeholder removed

15. Push Notifications

Component: `NotificationPermissionBanner`, `PushNotificationSettings` · **API:** `POST/DELETE/GET /api/notifications/subscribe`

What it does

Browser push notifications for when new daily actions are ready, milestones are unlocked, and weekly summaries are available. Works on desktop Chrome, Edge, Firefox, and Android Chrome.

How to enable

Method 1 — Banner (first-time prompt):

1. After completing onboarding, a **"Stay on track" banner** appears at the top of the dashboard
2. Click **Enable Notifications**
3. Browser shows a native permission popup — click **Allow**
4. Banner disappears, notifications are now active

Method 2 — Settings:

1. Go to </dashboard/settings>
2. In the **Push Notifications** section, click **Enable Push Notifications**
3. Browser permission popup → Allow

How to disable

- Go to Settings → Push Notifications → click **Disable Notifications**
- Or go to your browser's site settings and revoke the permission manually

Testing Checklist

- ☐ First dashboard visit post-onboarding → notification banner appears
- ☐ Click Enable → browser permission prompt appears
- ☐ Allow → banner disappears, no re-prompt on next visit
- ☐ Settings page → Push Notification status shows "Subscribed"
- ☐ Disable from settings → status changes to "Not subscribed"
- ☐ Re-enable from settings → works again without re-registering account

16. Weekly Summary Card

Component: `WeeklySummaryCard` · **API:** `GET /api/weekly-summary`

What it does

A dismissible recap card that appears at the top of the dashboard on **Monday, Tuesday, and Wednesday** only, showing last week's performance: actions completed, day streak, total sales, and top channel. Generated automatically by a background cron job each Sunday night.

Information shown

- Week label (e.g., "Week of Jun 23 – Jun 29")
- Actions completed last week
- Current day streak
- Total sales to date

- Top channel used
- Results highlight (if any results were logged)
- Sales progress toward Growth tier

How to dismiss

Click the **X** button in the top-right corner. The card will not appear again for the rest of this week (stored in browser localStorage per week start date).

Testing Checklist

- ☐ Visit dashboard on a Monday → summary card appears
- ☐ Visit dashboard Thursday–Sunday → summary card not shown
- ☐ Click X → card disappears immediately
- ☐ Refresh page after dismissing → card stays dismissed (localStorage check)
- ☐ Following Monday → new week's summary reappears

17. AI Insight Card

Component: `InsightCard` · **API:** `GET /api/insights`

What it does

Shows the latest unread AI-generated marketing insight personalised to your store. Insights are generated by the platform based on your niche, channel patterns, and market trends. Each insight includes a title, body text, and optionally a "Read more" link.

How to use

1. Insight card appears automatically on the dashboard below the weekly summary
2. Read the insight
3. Click **Dismiss** (or the X icon) to mark it as read — it will not show again
4. New insights appear as they are generated (typically weekly)

Testing Checklist

- ☐ Insight card appears if unread insight exists
- ☐ Insight content references your store niche
- ☐ Dismiss insight → card disappears, does not reappear on refresh
- ☐ No unread insights → card does not render (no empty space)

18. Progress Tracker

Component: `ProgressTracker` · **API:** `GET /api/progress`

What it does

Three stat cards at the top of the dashboard showing your current marketing momentum:

- **Actions this week** — how many actions completed in the current 7-day period
- **Current streak** — consecutive days with a completed action
- **Completion rate** — percentage of generated actions marked complete

Testing Checklist

- ☐ After completing today's action → "Actions this week" increments
- ☐ Complete actions on consecutive days → streak counter climbs
- ☐ Miss a day → streak resets to 0 the following day
- ☐ Completion rate = (completed / total) × 100, shown as a percentage

Quick Reference — All Dashboard URLs

Page	URL	Auth required
Dashboard Home	/dashboard	✓
My Content	/dashboard/content	✓

End-to-End Test Flow (Full User Journey)

Follow this sequence to verify every feature in one sitting:

1. Register at /register with a fresh email + accept terms
2. Verify email via inbox link
3. Complete onboarding (answer all questions)
4. Dashboard loads → action card shows today's task ✓
5. Note the channel shown on Today's Focus Panel
6. Copy the template from the action card
7. Mark Complete → "All caught up!" shown on card
8. Today's Focus Panel → "All done today!" ✓
9. Action History → completed action appears at top ✓
10. Expand completed row → log results (reach: 100, sales: 1) → Save ✓
11. Log a sale via Sales Tracker (channel: Instagram) ✓

12. Navigate to Milestones → "First Step Forward" and "First Dollar" now unlocked ✓
13. Navigate to My Content → generating banner (wait for all 6 pieces) ✓
14. Copy any content piece from the modal ✓
15. Milestones → "Content Creator" unlocked ✓
16. Navigate to Campaigns → pick an event → generate campaign plan ✓
17. Navigate to Outreach → add a contact → generate AI pitch ✓
18. Milestones → "Outreach Explorer" unlocked ✓
19. Navigate to Performance → shows locked (need 20 results) → progress bar shown ✓
20. Log 9 more sales (total 10) → Growth Engine milestone + upgrade banner ✓
21. Navigate to Settings → upgrade button visible ✓
22. Open Ask Stormo → ask "What is my niche?" → AI names your store ✓
23. Enable push notifications from the Settings page ✓
24. Dismiss the weekly summary card (if visible) ✓
25. All features verified ✓

Common Error States & What They Mean

Error / State	Cause	What to do
"Generation paused — Failed query"	Duplicate action for today in DB	Click Try Again — shows "All caught up" if already done
"Could not load performance data"	API timeout or no results yet	Refresh the page; check results have been logged
Onboarding required prompt on Content page	Onboarding not completed	Complete onboarding at /onboarding
Weekly content still generating after 4 minutes	AI generation stalled	Refresh the page — triggers a new generation attempt
Streak shows 0 despite recent activity	Missed a calendar day	Streaks reset if no action is completed on a given day
Upgrade button greyed/missing	Fewer than 10 sales logged	Log sales via Sales Tracker or Milestones page
Notification permission denied	Browser blocked popups	Go to browser site settings → allow notifications for this site
