Key Differences

Starter (\$29/month): Organic growth focus

For merchants who want to build an audience organically through social media, email, content, and influencer relationships. The AI recommends free or low-cost actions. Perfect for bootstrapped stores and those new to customer acquisition.

Growth (\$39/month): Organic + Paid Advertising

For merchants ready to invest in paid advertising alongside organic efforts. The AI includes paid ads strategies (Meta, Google, TikTok) with budget optimization and audience targeting. Includes advanced analytics to measure ROI across all channels.

Upgrade Path

Merchant starts with Starter (\$29/month). After logging 10 sales, Growth (\$39/month) becomes available for upgrade. Experienced merchants can contact support to unlock Growth early.

Support & Access

Both plans include the same core platform access, daily actions, results logging, and email support. Growth adds priority support response time and access to advanced paid advertising features.
