What is Stormo?

Stormo stands for Store Momentum. It is an AI marketing manager built specifically for ecommerce store owners. Stormo learns about your store, your products, and your customers and then gives you one focused marketing action every day to help you get more customers without relying on paid ads from day one.

How is Stormo different from other marketing tools?

Most marketing tools give you data, dashboards, or templates and leave you to figure out what to do next. Stormo tells you exactly what to do, when to do it, and why. It works like a real marketing manager sitting beside you every day, not a tool you have to learn how to use. There are no complicated setups, no marketing degrees required, and no ad budgets needed to get started.

Do I need a marketing background to use Stormo?

Not at all. Stormo was built for store owners, not marketers. Whether you have never done marketing before or have tried a few things without success, Stormo meets you where you are and gives you clear, simple actions anyone can follow.

What platforms does Stormo work with?

Stormo works with all major ecommerce platforms including Shopify, Etsy, WooCommerce, Squarespace, Wix, and BigCommerce. If you sell online, Stormo can help you get more customers.

Will Stormo work for my niche?

Yes. Stormo builds a personalized plan based on your specific store, your products, and your target customer. Whether you sell handmade jewelry, digital downloads, print on demand products, home decor, or anything in between, your daily actions are tailored specifically to your niche and your audience.

Do I need a big budget to use Stormo?

No. Stormo's Starter plan is built entirely around organic growth, meaning strategies that get you customers without spending money on ads. You can start with zero marketing budget and still build real traction. When you're ready to add paid ads, the Growth tier guides you on exactly when and how to spend wisely.

How much time do I need each day?

As little as 15 minutes. During onboarding you tell Stormo how much time you have and your daily actions are calibrated accordingly. Stormo works with your schedule, not against it.

I already have some sales, can Stormo still help me?

Absolutely. Stormo is built for store owners at every stage, whether you have zero sales, a handful of orders, or are already generating consistent revenue. If you have sales but want more consistency and growth, Stormo builds a plan that picks up exactly where you are and takes you further.

What happens after the \$9 trial?

After your first month at \$9 you are automatically moved to the Starter plan at \$29 per month. You will be notified before the transition and can cancel at any time before it takes effect. No hidden fees and no long term contracts.

Can I cancel anytime?

Yes. There are no long term contracts or cancellation fees. You can cancel your Stormo subscription at any time directly from your account settings.

When will I start seeing results?

Most store owners start seeing early signs of progress within the first 30 days, improved search visibility, more profile views, and increased engagement. Meaningful traffic and sales growth typically builds over 60 to 90 days of consistent daily actions. Stormo is built on the principle that consistency compounds. The more consistently you follow your daily plan the faster your results grow.

What is the Growth tier and how do I unlock it?

The Growth tier is Stormo's advanced plan at \$39 per month. It includes everything in the Starter plan plus advanced multi-channel marketing campaigns, paid ads guidance, a 60 day calendar opportunity queue, unlimited micro influencer outreach tracks, and priority customer support. Growth tier automatically unlocks as an option when your store reaches 10 sales. This is intentional. Stormo believes in building organic traction first so that when you add paid ads your spend is amplified, not wasted.

Can I unlock Growth before 10 sales?

Yes. If you have prior marketing experience or existing traction from another platform, you can request early access to the Growth tier directly from your dashboard. You will be asked to acknowledge that Growth is designed for stores with established organic traction. The choice is always yours.

How does paid ads guidance work in the Growth tier?

In the Starter tier Stormo focuses entirely on organic growth, building your search visibility, social presence, content strategy, and micro influencer outreach without ad spend. Once you unlock the Growth tier Stormo introduces paid ads guidance as part of your daily action plan. It tells you when you are ready to run ads, which platform to start on, how much to spend, and what to test. The goal is always to add paid ads on top of a working organic foundation, not as a substitute for one.

Is my store data safe?

Yes. Your store information and onboarding answers are stored securely and used only to personalize your Stormo experience. We never sell your data to third parties. Your information is yours.
